## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of claims 15 and 16 in the reply filed on 10/28/05 is acknowledged. The traversal is on the ground(s) that the searches of all the species would not be unduly burdensome. This is not found persuasive because searching all the species will be burdensome.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by JP410275545.

'545 discloses a method comprising: heating a first element (22) comprising an initial dimension, where the first element is part of an assembly, to a first temperature sufficient to expand the initial dimension to a first dimension, the first dimension greater than the initial dimension; and removing the first element from the assembly (Fig. 1; Abstract).

Regarding Claim(s) 16, it is inherent that a coefficient of thermal expansion of the first element (22) comprises a first value and a coefficient of thermal expansion of the assembly comprises a second value, the first value different than the second value, since the component 21 is removed from the assembly of component 22 and 21.
